

# Keeping It Real—Energy Security and Its Role in Financial Stability

OCTOBER 19–21, 2010  
Saipan, Commonwealth of the  
Northern Mariana Islands

## ISLAND ENERGY OFFICIALS AND ADVOCATES:

You are invited to attend the first Polynesia/Micronesia Regional Symposium on Energy Security

Hosted by the Energy Development in Island Nations (EDIN) partnership, this invitation-only venue introduces a successful model that is already helping island nations and territories implement cost-effective energy efficiency and renewable energy technologies to increase energy security.

The 3-day symposium is tailored to address the energy challenges of Polynesia/Micronesia with a focus on:

- Technology assessment and financing methods
- Effective policy and energy plan development and implementation
- Facilitated peer-to-peer information exchanges and lessons learned among the Pacific island nations.

Take this opportunity to:

- Understand how an integrated deployment methodology can comprehensively address energy needs and dramatically decrease dependence on imported fossil fuels
- Learn how this integrated approach is being applied in Hawai'i and the U.S. Virgin Islands
- Engage with other project and program implementers from the Pacific islands and experts from the United States and New Zealand about projects on islands in the Pacific region.

### Who should attend:

- Island energy ministers
- Utility company CEOs and managers
- Chambers of Commerce and Rotaries
- Energy divisions/offices

### Date:

October 19–21, 2010

### Location:

Hyatt Regency Saipan,  
Northern Mariana Islands
